Orchids

JULIUS ROEHRS CO., Exotic Nurseries
RUTHERFORD, NEW JERSEY

Cattleya Mossiae (see page 7)

A Few Words to Our Patrons

We have pleasure in presenting this Catalogue to our many friends and patrons and thank them for their generous support in the past, a continuance of which we respectfully solicit.

It has always been our aim to deserve the appreciation bestowed upon us and we hope to do still better in the future.

We have added considerably to our collection, which now comprises not only all the leading varieties, but hundreds of hybrids and botanical curiosities.

Our new range of Orchid houses covers an area of over 60,000 square feet, and is the most modern in this country.

Every plant is guaranteed true to name, and is offered subject to being unsold on receipt of order.

Prices quoted herein are for well-grown, established plants, and are given as a guide, larger and stronger plants at proportionate increase.

Prices are subject to change without notice.

Plants marked "Price on application" are rare, and only one or two in stock.

Full particulars of these will be furnished on demand.

Any one interested in Orchids or other plants is always welcome at our Nurseries, which can be reached via Erie R. R., from Jersey City, N. J., Rutherford being the first station out; or via electric cars, White Line Trolley from Hoboken, N. J., at the D. L. & W. Railroad depot.

Our experience is always at the service of customers requiring advice on the culture and care of these most interesting plants.

We beg to call especial attention to lists of Orchids prepared for beginners. See pages 29 and 30.

BUSINESS TERMS

Orders from unknown parties must be accompanied with remittance or satisfactory references.

Orders for goods desired sent C. O. D. must be accompanied with 50 per cent of amount of order.

All claims must be made on receipt of goods; otherwise they will not be considered.

All goods travel at purchaser's risk after they are in the hands of the express company.

Packing will be done in the most up-to-date manner, and will be charged at cost.

Customers of approved references will receive a credit of thirty days.

All quotations are f. o. b., Rutherford or New York City.

We will deliver within 50 miles of New York City by automobile, if so desired, provided orders are large enough. Charges will be at cost.

GARDENERS AND SUPERINTENDENTS

We always have on our books names of highly qualified and experienced gardeners. We are always careful to recommend none but well-tried men. No charge whatsoever is made for such service to either party. We can always recommend young men with experience in growing Orchids.

Left-hand corner Gold Medal Group, Boston, May, 1910

ORCHIDS

The Queen Family of the Vegetable Kingdom, they are ever increasing in popularity.

No other plant family produces such an abundance of so many differently colored and formed flowers.

There is a never-ceasing variety and the flowers have a lasting quality unequaled by any other.

These are of easy culture and may be successfully grown side by side with Ferns, Stove and Greenhouse plants.

Orchids are a source of great pleasure to the cultivator and the amateur will watch with deep interest the development of these plants.

Some people still have the impression that Orchids are difficult to grow, but we assure our patrons that, with the exception of some few rare varieties, quite the contrary is the case. In fact, they are no more difficult of culture than the ordinary greenhouse plant.

It is naturally essential that in order to have the desired success, only well-grown and established plants are purchased.

Epiphytal Orchids, Cattleyas, Laelias, Dendrobiums, Etc.

Require plenty of light and air, without, however, being exposed to the full sun; this necessitates shading the greenhouse in summer. Give them plenty of water when growing, allowing the plants to dry out occasionally. Decrease the water supply gradually when growth gets completed in order to ripen the pseudo-bulbs. Increase water supply again when buds appear in order to develop the flowers to perfection.

They have a season of rest of more or less duration, but we wish to emphasize the fact that at no time should water be withheld too long, in order not to cause the plants to shrivel.

In this country, many Cattleyas, after finishing one growth will start another, an action which should be encouraged, as these bulbs will be fully developed and ready for flowering. Some Dendrobiums after finishing their growth require a lengthy season of rest. They should be watered sparingly during that time.

Terrestrial Orchids, like *Cypripediums*, etc., have no season of rest and require a shadier position.

A temperature of from 60 to 65 degrees at night with correspondingly more during the day will suit most of them. The time for repotting is after flowering, when they begin to show signs of growth. They should be potted firmly and special attention is called against over-potting. The best potting material is fibrous peat, with some Sphagnum Moss added for some varieties, and plenty of drainage.

For further information, see cultural directions under Species, also List of Books on Orchids and their culture, on page 31.

DESCRIPTIVE PRICE-LIST OF ORCHIDS

ACAMPE multiflora. From India. Flowers yellow, red-spotted, in erect, branching panicles. Same habit as <i>Vandas</i> .	Each \$2 50	Aerides crassifolium. Burma. Flowers amethyst-purple; fragrant, long, drooping spikes. Summer.	Each \$5 00
ACINETA Barkeri. Mexico. Golden yellow flowers.	2 50	Fieldingii. India. Flowers white, rose.	
Humboldtii. Colombia. Flowers chocolate-purple, petals rose. Two to 3 inches in diameter. Spikes 2 feet long. Spring.	2 50	Houlletianum. Sepals and petals buff magenta-tipped, lip creamy white. Cochinchina. Spring.	\$10 to 15 00
ACROPERA Loddigesii. Mexico. Flowers tawny yellow, curiously constructed; same culture as <i>Stanhopeas</i> . Flowers summer.	2 50	mottled. Early summer. \$3.50 and 5 00	
ADA aurantiaca. Colombia. Flowers showy cinnabar-orange. Winter and spring.	2 00	odoratum majus. India and China. Flowers creamy white, blotched with magenta; scented. Summer.	5 00
AERIDES. Beautiful epiphytal Orchids. Flowers often scented; borne in drooping racemes.		Sanderianum. Philippines. Very showy species; sepals and petals creamy white; magenta-tipped lip. Summer.	10 00
		ANÆCTOCHILUS Lowii.	15 00
		ANGRÆCUM eburneum. Madagascar. Large-growing species. Flowers large; lip white; sepals and petals tinted green. Summer.	\$5 to 15 00

Angræcum leonis.

Each

Flowers pure white, borne on short racemes. Madagascar.

Autumn \$7 50

Modestum; syn., Sanderianum.

From Comaro Islands. Flowers pure white. Summer.....\$3 to

5 00

sesquipedale. Madagascar. Large, ivory white flowers, with spur about a foot long.....\$5 to

15 00

Scottianum 10 00**ANGULO** (Cradle Orchid.) A handsome, flowered coal-house Orchid. Colombia.**Clowesii.** Large, golden yellow flowers. Spring..... 2 50**eburnea.** Sepals and petals pure white; lip slightly pink-spotted. Spring.....\$5 to

10 00

Ruckeri. Sepals and petals yellow, crimson-spotted; lip crimson..... 2 50**ANSELLIA Africana.** Similar treatment to Cymbidiums, with higher temperature. Flowers yellow, spotted with red. Sierra Leone... \$5 to

10 00

ARACHNANTHE Clarkii 5 00**ARPOPHYLLUM giganteum.** Mexico.

May be grown with Cattleyas.

Flowers rose-purple. Spikes 12 inches long \$2.50 to

3 50

BARKERIA; syn., EPIDENDRUM.**BIFRENARIA.** A genus allied to Maxillaria, requiring similar culture.

Each

atropurpurea. \$3 50**aurantiaca.** Flowers yellow, orange-spotted. British Guiana..... 2 50**Harrisoniæ.** Large, scented, yellow flowers..... 3 50**BOLLEA celestis.** 10 00**Lalindei.** 10 00**BRASSAVOLA.** Intermediate epiphytal Orchid.**cucullata.** 1 50**Digbyana.** 2 50**glauca.** 2 00

Right-hand corner of Gold Medal Group, Boston, May 26, 1910

**BRASSO-CATTLEYAS.** Strong flowering plants. 1 to 2 leads. Each× **Fournieræ** (Brassavola Digbyana × Cattleya labiata). \$15 00× **heatonense** (B. Digbyana × C. Harrisoniana). 15 00× **Hyeæ** (B. Digbyana × C. Harrisoniana). 15 00× **langleyensis** (B. Digbyana × C. Schroederæ). 15 00× **Mariæ** (B. Digbyana × C. Warneri). 15 00× **Maronæ** (B. Digbyana × C. gigas). 15 00× **Maroni** (B. Digbyana × C. Mendelii). 15 00× **Sedeni** (B. Digbyana × C. Trianae). 15 00× **Thorntoni** (B. Digbyana × C. Gaskelliana). 15 00× **Veitchii** (B. Digbyana × C. Mossiæ). 15 00**BRASSO-CATTLEYA-LÆLIA**× **Rowena** (B. Digbyana × Lælia Cattleya × Doris). 15 00**BRASSO-LÆLIA.** Strong - flowering plants. One to 2 leads.× **Gratrixiæ** (Lælia cinnabaræina × B. Digbyana). 20 00× **Helen** (Brassavola Digbyana × Lælia tenebrosa). 12 00× **Veitchi** (B. Digbyana × L. purpurata). 15 00× **Jessopi** (B. Digbyana × L. Xanthina). 15 00**Bifrenaria Harrisoniæ**

Brasso-Cattleya Fournierae

BRASSIA coccinata	Each \$3 50
Lawrenceana (Spider Orchid). Striking. Flowers dark yellow with dark purple blotches. Lip pale yellow, with purple spots. September. Costa Rica. \$3.50 to	5 00
Ocanensis	2 50
verrucosa . Petals and sepals greenish blotched dark purple. Lip white, warted black-green. Guatemala. Spring	2 50
BROUGHTONIA sanguinea . Flowers blood color. Same culture as <i>Laelias</i>	3 50
BULBOPHYLLUM . A genus of epiphytal Orchids of great botanical interest.	
Careyanum	3 50
comosum (Bay-scented).....	3 50
Congoensis	10 00
cupreum (Copper-scented).....	3 50
Dayanum (Trap Orchid).....	3 50
densum	3 50
Godseffianum	7 50
Lobbii	3 50
suavissimum	3 50
saurocephalum (Crocodileheaded).....	5 00

BURLINGTONIA fragrans. Each
Beautiful, dwarf, leafy
epiphyte. Flowers in
pendent racemes, pure
white, very fragrant; lips
stained with yellow.
Brazil. Early winter... \$5 00

CALANTHE. Terrestrial
Orchid of easy culture.
Grown well in loam
mixed with dry cow-ma-
nure. Water freely while
growing. Require de-
cided rest after flower-
ing. Bloom in mid-
winter. Produce long
flower-spikes from base
of bulb.

Bella	2 50
Bryan	2 50
Cornelius Vanderbilt	3 50
Regnieri	1 50
Veitchii	2 00
vestita	1 50
Wm. Murray	2 00

CAMAROTES purpurea.
Very rare..... 10 00

CATASETUM. A curious
and interesting genus.
The flowers are borne on
erect or sub-pendulous
spikes. Male and female
flowers, which differ in
structure and color, are
usually borne on distinct
spikes.

Bungerothii. Flowers often
4 in. across; pure white.
Brazil. Summer..... 10 00

callosum. Flowers medium
size, dark brown and
green. Venezuela. Fall. 2 50

macrocarpum (Jumping
Orchid). Sepals and
petals yellow, shaded
with green and spotted
brown. Lips orange-yel-
low, spotted brown.
Tropical America. Sum-
mer..... 3 50

Brasso-Laelia Gratixiae

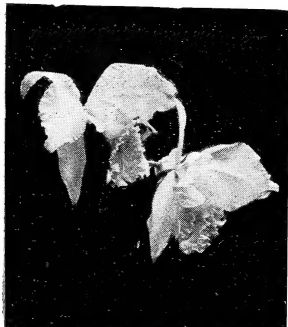

Calanthe oculata gigantea

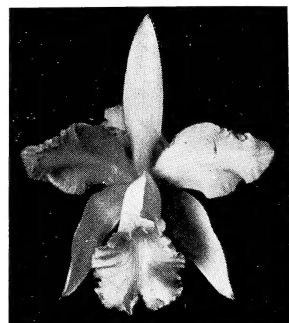

Calanthe Veitchii

CATTLEYA

Cattleya Mossiæ,
var. Mrs. Julius Roehrs

Cattleya Dusseldorffii,
var. Undine

Of all Orchids, they and the closely allied genus *Laelia* are the most popular.

The gorgeous flowers, produced in endless variation, are most adaptable for decorative work and are in ever-increasing demand.

With one or two exceptions, the flowers are borne on upright scapes.

Some Cattleyas like *Cattleya gigas*, *C. Gaskelliana*, *C. Harrisonæ*, etc., will produce flowers from the new pseudo-bulbs immediately the growth is finished, while other varieties like *Cattleya Mossiæ*, *C. Mendeli*, *C. Schrøderæ*, etc., will produce the flowers from the new pseudo-bulb after a rest.

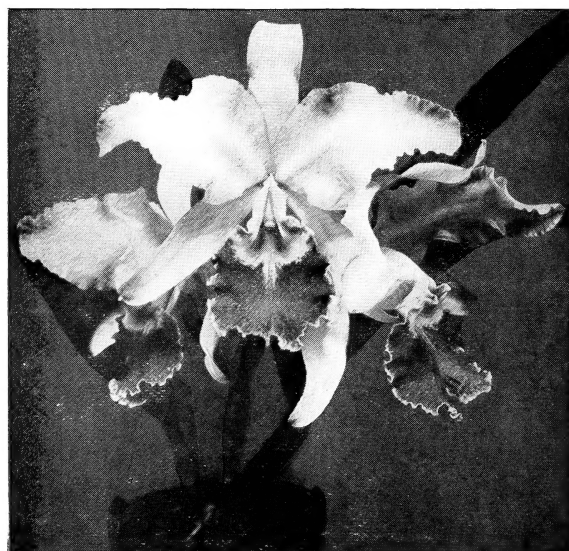

They thrive best in a temperate house with plenty of moisture. They can be placed in pots, pans or baskets using good fibrous

peat with plenty of drainage. The best time for repotting Cattleyas is after they have flowered and care should be taken to pot them firmly.

Though they require shading from the strong sun in summer, it must be borne in mind that they like the light, and dark houses should be avoided. Air should be admitted to the house whenever the outside temperature permits. 

Cattleya Aclandiae. Dwarf habit. Flowers olive-green, blotched with purple. Brazil. Strong plants. Summer...	Each \$3 to \$5 00
amethystina. See <i>Intermedia</i> .	
amethystoglossa. Brazil. Flowers spring.	\$3 to 5 00
bicolor. Long, slender bulbs. Flowers large; sepals and petals bronzy green; lip rose-purple.	5 00
Bowringeana (Known as the autumn-flowering <i>Cattleya Skinneri</i> . Honduras.)	\$2.50 to 5 00
Bowringeana cœrulea.	25 00
Specimens	\$10 to 25 00
citrina. Flowers have the form of a tulip of brown-yellow color and fragrant. Borne singly, hanging downward.	2 00
Dowiana. Large, handsome flowers; sepals and petals nankeen-yellow, crimson flushed beneath; lip crimson-purple, streaked with gold. Costa Rica...	\$4 to 10 00

Cattleya Dowiana. Specimens	Each \$15 to \$25 00
Dowiana aurea. Sepals and petals primrose-yellow, devoid of the crimson flush. Lip with more yellow. Colombia.	\$5 to 12 00
Of <i>Cattleya Dowiana</i> and <i>C. Dowiana aurea</i> we have 2000 plants, the largest stock of any commercial house. The plants are nearly all established and in the very best of condition.	
Dowiana chrysotoxa. Lip deep crimson-purple, with deep gold veining. Colombia.	Each \$5 to \$12 00
Eldorado. Petals and sepals bluish; white; front part of lip purplish magenta. Throat deep orange. Early autumn. Not very desirable. Rio Negro.	\$2.50 to 5 00
Forbesii. Sepals and petals yellowish; lip yellow, streaked red on the side lobes.	2 00
Gaskelliana. Petals and sepals rose-flushed; lip amethyst-purple. Free grower.	\$2 to 10 00
Gaskelliana alba. Strong, healthy plants. Four bulbs; one lead.	\$10 to 15 00
Gaskelliana cœrulea. Good strong plants	50 00
gigas (Sanderiana). Very free-flowering; flowers very large; petals and sepals dark rose; lip magenta-purple. Colombia	\$3 to 7 50
Very strong plants	10 00
Specimens	\$15 to 25 00
gigas cœrulescens. Strong plants	50 00
gigas superba. Very dark variety. Strong plant; five bulbs; one lead.	150 00
gigas, Frau Melanie Beyrodt. Pure white sepals and petals; dark lip. Four bulbs, one lead.	150 00
gigas (Hardyana type). A later-flowering variety	\$3 to 5 00
Large plants	\$7.50 to 10 00
granulosa. Several flowers on spike. Petals and sepals olive-green, brown-spotted; lip whitish, spotted with crimson. Brazil	\$3 to 5 00
guttata. Brazil. Late autumn.	2 50
Harrisonæ. Flowers several on spike. Rose-lilac. Fine for cutting. Brazil	\$2 to 4 00

Cattleya gigas, var. Frau Melanie Beyrodt

Cattleya labiata, Mrs. Julius Roehrs

Cattleya intermedia. Slender bulbs. Sepals and petals rose-flushed, lip rose-purple. Brazil. Summer.....	Each	\$2 50
intermedia alba. Flowers pure white.....	20 00	
Lawrenceana. Flowers medium size; rose-purple. Several on spike. Spring. British Guiana.....	\$7.50 to 10 00	
labiata. One of the most popular. Very floriferous. Fine for cut-flowers. Our type of these is unequalled. Autumn. Brazil.....	2 50	
Large plants.....	7 50	
Specimens from.....	10 up..	
labiata, Mrs. Julius Roehrs	Price on application	
labiata alba		
labiata, Mrs. G. B. Wilson		
Four bulbs; one lead.....		
labiata Polychilus		
luteola. Brazil. Summer.....	Each \$5 00	
Leopoldi. Brazil. July-August.....	\$3.50 to 5 00	
maxima. Sepals and petals rose; lip veined dark crimson. Ecuador. November.....	\$2.50 to 5 00	
Mendelii. Flowers variable from white to light pink. Lip crimson-purple; very crimped. One of the best Cattleyas. Colombia. May.....	\$2.30 to 7 50	
Specimens.....	\$10 to 20 00	

Cattleya Mendelii alba. One of the finest white Mendelii ever flowered. Price on application. Each

Mendelii, Rutherford. White petals and sepals; purple lip.....\$100 00

Mossia. Flowers large; very variable; large, crimped lip. Venezuela. May, June.....\$2.50 to 5 00
Specimens.....\$10 to 20 00

Mossia cœrulescens.....25 00

Mossia, H. Graves. Very large flower; pure white sepals and petals; lip flush of heliotrope. Price on application. Grand specimen; six leads. Price on application.

Cattleya Lawrenceana

Cattleya aurea

- Cattleya Mossiæ Reineckiana**..... Each \$35 to \$75 00
Mossiæ Reineckiana, Seedlings. Four to five bulbs; unflowered..... 5 00
Mossiæ Wagneri; syn., *alba*..... \$50 to 100 00
Percivaliana. Flowers are of a deep rose-color; rich colored lip of deep crimson and purple. Early winter. Venezuela \$2.50 to 5 00
 Large plants..... \$7.50 to 15 00
Percivaliana alba..... Price on application.
Percivaliana, The Little Gem. Sepals and petals white; yellow throat, with spot of purple on lip..... Price on application.
Rex. Very rare. Peru. Summer..... 100 00
Schilleriana. Resembles *Cattleya Aclandiae*. Summer. Brazil..... \$3 to 5 00
Schröderæ. Large, sweet-scented flowers, resembling *Cattleya Trianæ*. Broad, waved sepals and petals, usually light rose, deeper in lip, with yellow throat. There are, however, many variations. Colombia. Spring..... \$2.50 to 35 00
 Large plants..... \$7.50 to 15 00
Schröderæ alba..... Price on application.
Schröderæ, The Baroness. Almost pure white petals and sepals, with a labellum closely resembling *Cattleya labiata*..... Price on application.
Schröderæ, W. Duckham. Price on application.
Skinneri. Flowers in clusters, rose-purple. Guatemala. Spring..... \$2 to 5 00
Skinneri alba..... 35 00
Speciosissima. Flowers very large; petals and sepals plush rose; rich lip. Venezuela..... \$2.50 to 5 00
speciosissima, Excellence. Petals and sepals pure white. Fine dark lip..... Price on application.
Trianæ. The most useful *Cattleya* for cut-flower purposes. Flowers in winter. Flowers vary from light rose to purple. Our stock of these is unequaled, and we have thousands to choose from..... \$2 to 5 00
 Large plants..... \$7.50 to 10 00
 Specimens..... \$12.50 to 20 00

- Cattleya Trianæ, alba**..... Each \$35 00
Trianæ, Backhouseana. Very fine variety. 35 00
Trianæ cœrulea. Very large flower; fine form..... 100 00
Trianæ Colossus..... 25 00
Trianæ delicata..... 10 00
Trianæ gigas..... 75 00
Trianæ Illustris..... 15 00
Trianæ Rœhrsiana..... 50 00
Trianæ Rœblingiana..... 75 00
Velutina. Slender stems. Flowers fragrant. Sepals and petals orange, spotted with purple. Lip violet-veined. Brazil. Late summer..... \$3.50 to 5 00
Warneri. Large flowers. Sepals and petals deep rose; lip deep crimson. Brazil. May..... \$3 to 5 00

Cattleya Hybrids

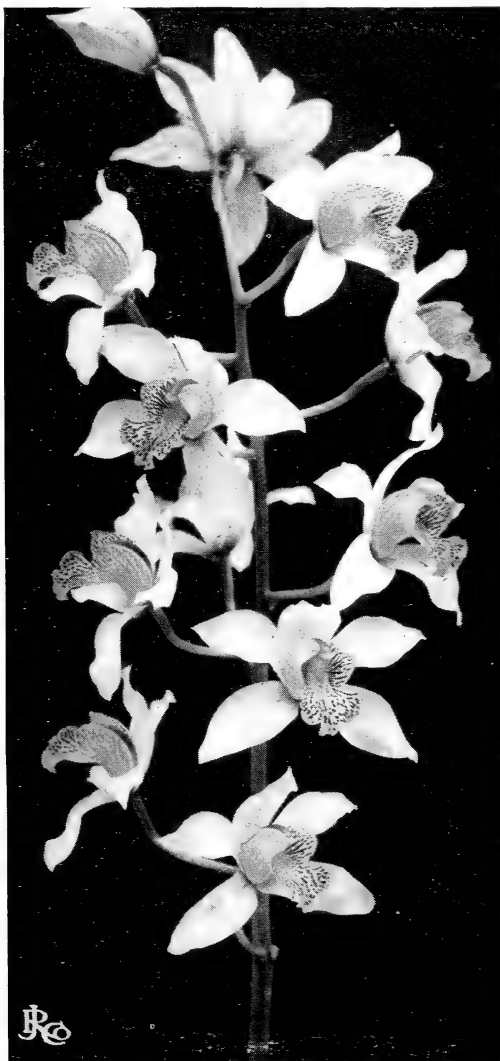

- CATTLEYA × Adonis (Enid) (C. Mossiæ × C. gigas)**..... Each \$25 00
× Dusseldorfi, var. Undine syn., (C. × MacKayi (C. Intermedia alba × C. Mossiæ alba)..... \$50 to 75 00
× Edwardi (C. Schilleriana × C. gigas).... 7 50
× Empress Frederick (C. Mossiæ × C. Dowiana)..... 15 00
× Fernandi (C. gigas × C. Aclandiae)..... 12 00
× Hardyana (Natural Hybrid) (C. gigas × C. chrysotoxa)..... Price on application.
× Jocasta (Schröderæ × Mossiæ)..... 10 00
× Octave Doin (C. Mendelli × C. Dowiana) 25 00
× Portia (C. labiata × C. Bowringiana)..... \$10 to 25 00
× Rafæiæ (Maggie Rafæi) (C. Dowiana × C. Trianæ alba)..... 35 00
× Thayeriana (C. Schröderæ × C. intermedia)..... \$7.50 to 10 00
× Williamsiæ (C. Gaskelliana × C. Harrisonæ)..... 10 00
CHYSIS aurea. Sepals and petals yellow; lip tawny. Venezuela. Spring..... 2 00
bractescens. Flowers large; sepals and petals white; lip yellowish, with crimson markings. Peru. Spring..... 5 00

Cirrhopetalum pulchellum

CIRRHOPETALUM. A genus of remarkable Eastern Orchids closely allied to Bulbophyllum and requiring the same culture.

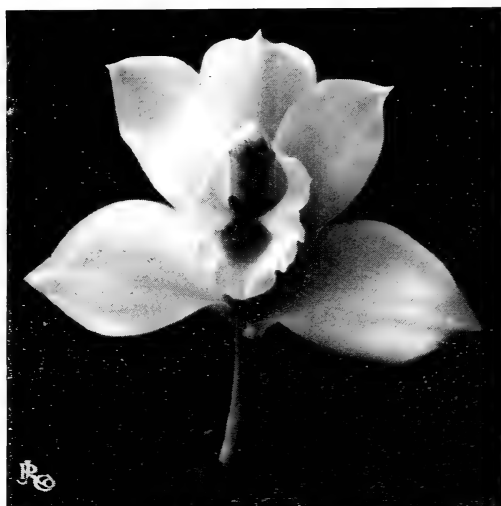

<i>appenticulatum</i>	Each \$5 00
<i>cylindraceum</i>	2 50
<i>picturatum</i> (Spotted Nodding Orchid)....	3 50
<i>pulchellum</i>	10 00
<i>refractum</i> (Windmill Orchid).....	3 50
<i>Roxburghi</i>	5 00
<i>Thouarsii</i> (Chinese Nodding Orchid).....	7 50

Cymbidium Insigne

<i>CÆLIA Baueri</i>	Each \$3 50
<i>macrostachya</i>	3 50

CÆLOGYNE. A showy-flowered genus, most variable in the size and coloring of the flowers.

Cymbidium eburneum

Cœlogyne asperata (Lowi). Flowers in Each
drooping racemes. Sepals and petals
creamy yellow; lip yellow, veined with
red and brown and orange. Borneo.
Summer.....\$10 to \$15 00

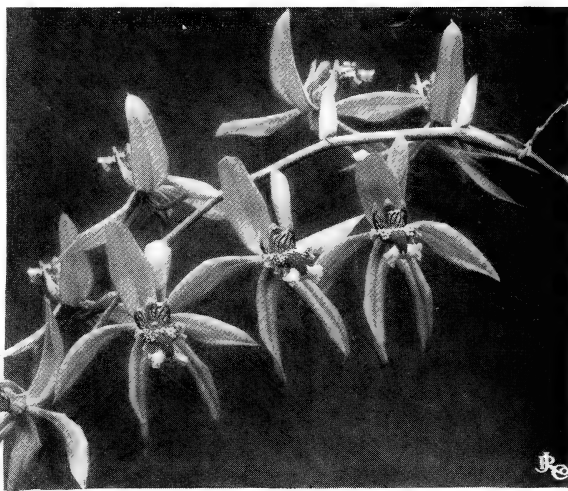

barbata. Spikes erect, sepals and petals
pure white; lip bearded with brown hairs 2 00

corrugata. Spikes erect. Sepals and
petals pure white; lip yellow and white,
marked with orange. Khasya. Summer. 2 00

Cœloches chlorochilon

Cœlogyne cristata. Large, pure white flowers; center of lip stained yellow; drooping racemes.....	Each \$5 00
Large plants	\$7.50 to 10 00
cristata alba	\$3 to 5 00
cristata hololeuca. Pure white, without trace of yellow	5 00
Dayana. Scapes pendent, 2 to 3 feet long; many-flowered. Sepals and petals ochre-yellow; lip white, striped with chocolate. Borneo. Spring and summer	2 50
fimbriata	2 50
fuliginosa	2 50
flaccida. Drooping racemes; whitish flowers, with white lip, on which is a disc of yellow. Each North India. Spring	\$2 50
Lawrenceana	\$3.50 to 5 00
Massangeana. Assam.....	3 50
Meyeriana. Flowers large; green sepals and petals; green and black spots. Tropical Asia. Late summer.....	Each \$2 50
ocellata. North India. Spring.....	2 50

**Cœlogyne pandurata**

Cœlogyne pandurata	Each \$3 to \$5 00
speciosa	2 00
tomentosa	\$3.50 to 5 00

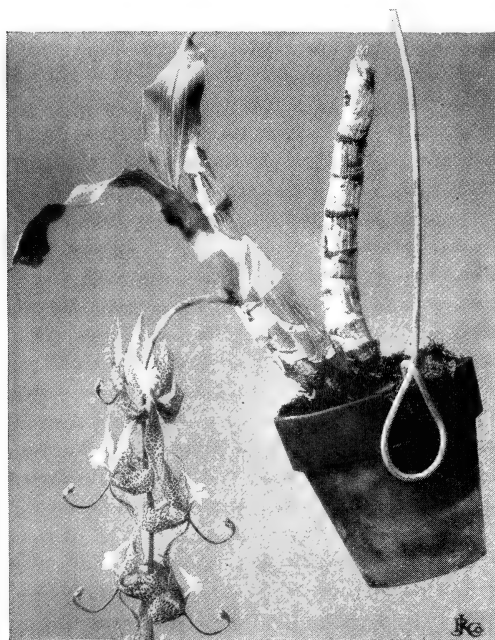

CYCNOCHES chlorochilon (Swan's Neck Orchid.) An interesting genus. Flowers curiously constructed. Culture similar to Catasetums. Central America. Summer

.....	\$2.50 to 5 00
-------	----------------

CYMBIDIUM aloifolium	\$2 to 4 00
eburneum. Flowers large, creamy white; fragrant. Northern India. Feb....	\$3 to 5 00
giganteum. Large-flowered. Winter.	\$3 to 10 00
Insigne (Sanderi). New. Very fine..	\$10 to 15 00
lanæfolium	2 00
Lowianum	\$3.50 to 7 50
Specimens.....	\$10 to 25 00
Lowi eburneum. Flowers large; many on spike. Very lasting. Burma. Winter.	10 00
Mastersii	\$5 to 15 00
tigrinum	10 00
Traceyanum	\$5 to 10 00
Specimens.....	15 00

Cymbidium Hybrids

Insigne × C. Veitchii.....	Price on application.
Lowianum concolor × C. Insigne.....	Price on application.
Veitchii C. Lowianum × C. eburneum.	Price on application.

**Cycnoches chlorochilon**

CYPRIPEDIUMS

These most interesting plants of the Orchid family offer an endless field of enjoyment to the amateur.

The many varieties and almost unlimited number of Hybrids, each one varying in color, form and often foliage, are almost bewildering.

A Cypripedium house is never bare of flowers. They are of easy culture, and no collection of Orchids should be without at least some of them.

Cypripediums are terrestrial Orchids and have no season of rest. The great majority of them grow best in a temperate house with plenty of moisture, and air.

Cypripedium bellatulum

CYPRIPEDIUMS, continued

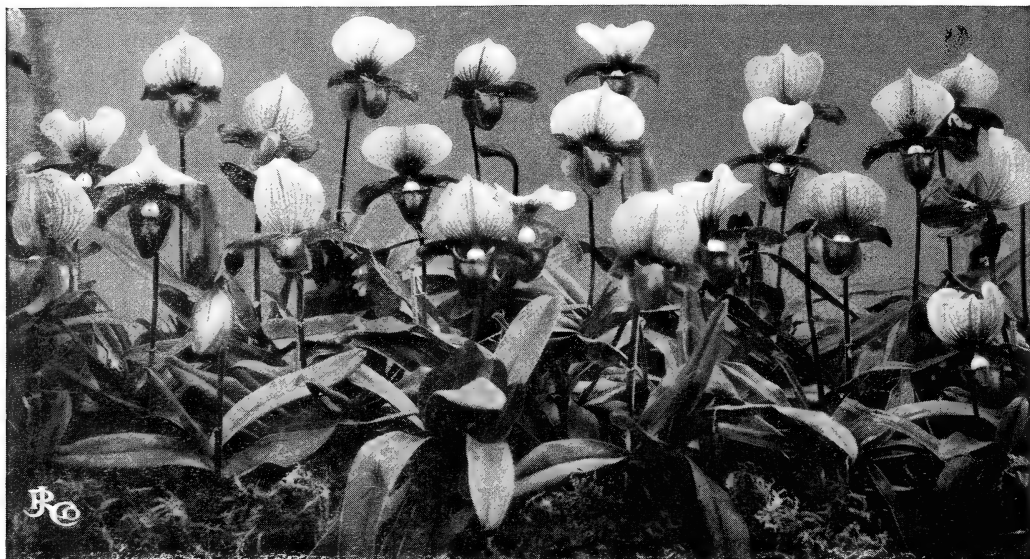

They thrive best on the shady side of the greenhouse. They should be potted in compost of fibrous peat and sphagnum moss with a few small lumps of fibrous loam added, where available.

As they are of a rather luxuriant growth reasonably larger pots can be used when repotting.

	Each		Each
Cypripedium Appletonianum.....	\$2 50	Cypripedium insigne.....	\$1 to \$3 00

DENDROBIUM

A large and popular genus of epiphytal Orchids, distributed throughout the tropics of the eastern hemisphere from East India to China, from the Philippines to Australia.

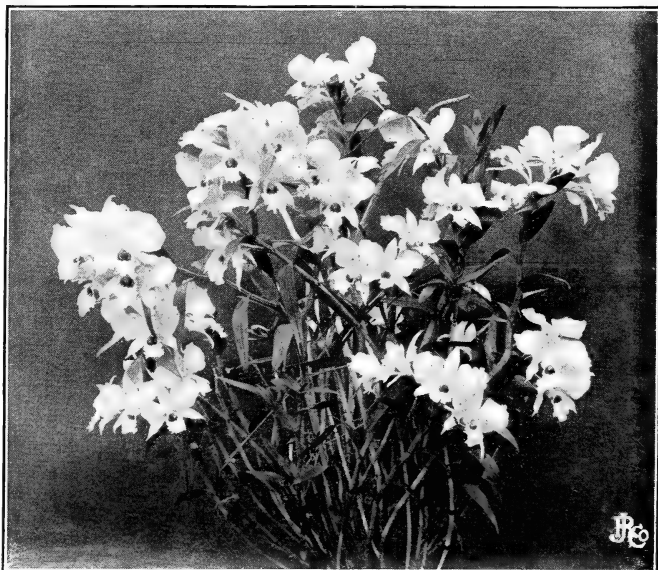

With so large a genus and so wide a distribution, it is only natural that many of the species differ from each other.

The plants vary in habit from dwarf tufted varieties barely 3 inches high to others with pseudo-bulbs 3 to 4 feet high. The mode of culture varies somewhat.

With few exceptions they require plenty of heat and moisture while making their growth. When the growth is completed they require a time of cooler treatment with plenty of light and air to ripen the growth; then follows a season of rest of more or less duration according to variety. As soon as the flowers begin to show on the bulbs they should be put warmer in order to being out the flowers. The time for repotting is after they have flowered.

They grow best in pans or baskets, hung near the glass in a mixture of fibrous peat and Sphagnum Moss.

The smallest possible pans or baskets should be used as Dendrobiums as a rule are very sensible against overpotting.

Dendrobium Jamesianum (see page 18)

*Dendrobium Thyrsiflorum* (see page 20)

<i>Dendrobium albo-sanguineum</i> . Flowers	Each
creamy white.....	\$3 00
<i>atro-violaceum</i> . Sepals and petals creamy	
white, spotted with purple. Lip violet-	
purple shaded with green. New Guinea.	3 50
<i>barbatulum</i> . Flowers in dense racemes;	
white tinged with pink. East Indies....	2 50
<i>Bensoniæ</i> . Petals and sepals white; orange	
lip, with dark spots at base.....	2 50
<i>bigibbum</i>	2 50
<i>bellatulum</i>	4 00
<i>Bronkhardtii</i>	10 00
<i>Brymerianum</i> . Very beautiful yellow flow-	
ers; lip with a long, beard-like, netted	
fimbriation. Burma. Spring.....	3 50
<i>Cambridgeanum</i> ; syn., <i>Ochreatum</i> .	
Bright orange-yellow flowers; large, red	
blotch on lip. India. Spring.....	3 00
<i>capillipes</i>	2 00
<i>cariniferum</i> (Keeled <i>Dendrobium</i>).....	7 50
<i>chrysanthemum</i> . Flowers deep rich yellow;	
lip fimbriate with two dark maroon spots.	
India.....	3 50
<i>chrysotoxum</i> . Rich golden yellow flowers.	
India.....	2 50
<i>chrystallinum</i> . Flowers white tipped with	
purple. Lip orange at base. Arracan	
Mountains. Summer.....	2 50
<i>ciliatum annamense</i> (Haired <i>Dendrobium</i>)	3 50
<i>cœlogyne</i> . Habit like a <i>Bulbophyllum</i> .	
Flowers green marked with purple.	
Moulmein. Autumn.....	3 50
<i>crassinode</i> . Petals and sepals white, tipped	
with purple. Lip same, with orange-	
yellow disc.....	2 50
<i>Dalhousianum</i> . Strong grower. Large	
flowers. Petals and sepals tawny yellow,	
shaded with rose. Lip fringed, marked	
with two large crimson blotches.....	3 50
<i>Dearei</i> . Rare. Flowers in clusters. White	
with pale green center. Spring..	\$3.50 to 5 00

*Dendrobium Phalænopis Schröderianum* (see page 18)

Dendrobium densiflorum. Flowers in dense, pendulous trusses. Sepals and petals amber-yellow; lip orange. India. Spring. \$2 50	Each
Devonianum. Slender, pendulous stems; sepals and petals creamy white, tinged with pink; petals magenta tipped; lip white, margined with purple, fringed. India. Spring.....	3 00
eriaeflorum	2 50
Falconeri	2 50
Findleyanum. Flowers white, tipped with magenta-pink; lip has orange-colored base. Moulmein. Winter and spring.....	\$2.50 to 5 00
Dendrobium formosum giganteum. Flowers in clusters. Large, pure, white; lip stained orange-yellow. Burma. October-December.....	\$1.50 to \$4 00
heterocarpum; syn., aureum. Flowers fragrant. Sepals and petals amber; lip velvet-like markings of brown and purple. India. Spring.....	2 50
infundibulum. Flowers in clusters; pure white, except a yellow stain on lip. Moulmein. Spring.....	2 50
Jamesianum. Differs from Infundibulum in having a cinnamon-red stain on lip. Moulmein. Spring, summer.....	2 50
lituiflorum.	3 00

macrophyllum. Sepals yellowish; petals creamy white; lip yellowish, marked with purple. New Guinea. Summer. \$3 each.

moschatum. Sepals and petals yellowish, tinged with rose; lip yellow; has two black-purple blotches. Musk-scented. India. Spring and summer. \$2.50 each.

McCraei. \$5 each.

Nobile. Very popular. Flowers vary from light rose to shades of purple. India. Winter and spring. \$2 to \$5 each.

nobile Cooksonianum. \$5 each.

nobile nobilium. Very rich color. \$5 each.

nobile virginale. Chaste white form. Large plants. \$10 each.

Parishii. Flowers rich dark rose; lip has two purplish blotches in throat. Moulmein. Spring. \$2.50 to \$5 ea.

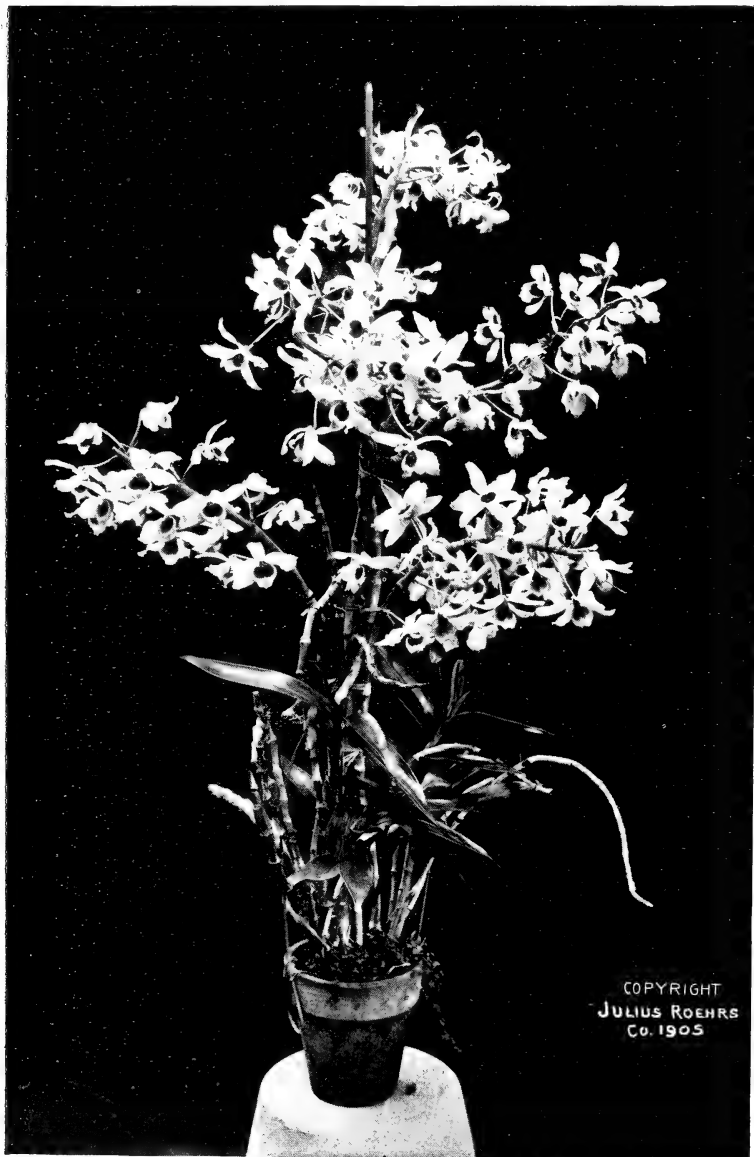

Phalænopsis Schröderianum. One of the finest Denrobiums for cutting. Flowers in long, terminal spikes. Color varies from blush-rose to purple. New Guinea. October, November. \$2 to \$4 each.

Phalænopsis Schröderianum alba. Roehrs' variety. The largest specimen in cultivation. Price on application.

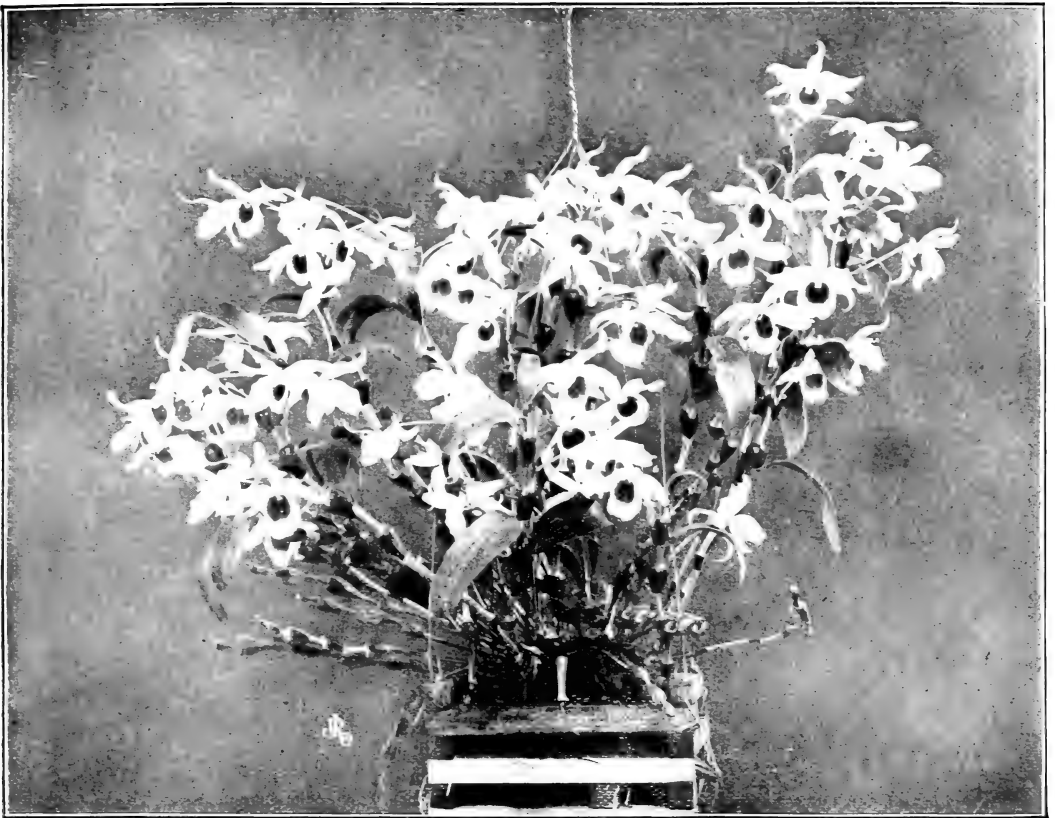

platicaulon. Flowers straw-yellow. Philippines. Summer. \$2.50 each.

primulinum. \$2.50 ea.

regium. New. Flowers beautiful rose. \$5 ea.

Dendrobium Wardianum (see page 20)

Dendrobium Findleyanum (see page 18)

Dendrobium formosum giganteum (see page 18)

Denbrobium Sandaræ. New. Very fine. Each	
Flowers in clusters like <i>D. Dearei</i> . Flowers white, purple center.....	\$15 00
speciosum. Flowers pale cream-yellow. Lip spotted with purple. Australia. Spring.....	2 50
Stattherianum.	2 50
Thyrsiflorum. Flowers in large, drooping clusters. Sepals and petals white, often pink-flushed; lip golden orange...\$2.50 to	5 00
Wardianum giganteum. Very large flowers coming in clusters of two and three along the pseudobulbs. Sepals and petals white, tipped with purple. Lip bright orange, with two eye-like blotches of crimson magenta. India. Winter, spring.	\$2.50 to 5 00
Wardianum album	15 00

<i>monostachys</i>	3 50
<i>obesa</i> (The Fat Orchid).....	3 50
GALEANDRA lacustris (Helmet Orchid)....	3 00
GOMEZA planifolia . Flowers yellowish, sweet-scented; densely carried in short arched spikes.....	2 50

	Each
HARTWEGIA purpurea . Pleasing rose- purple-flowers, carried on erect spikes. Mexico.....	\$3 50
HOULLETIA odoratissima . Allied to Stan- hopeas, requiring similar culture. Petals and sepals brownish red, with darker lines; lip tipped with yellow; violet- scented. Colombia. Summer.....	3 50
ISOCHILIS linearis . Flowers very pretty rose-red, shaded with purple. Tropical America. Spring, summer.....	3 50

LAELIAS

They are fine, showy Orchids and are closely allied to Cattleyas. The only difference is that they carry eight pollinae instead of four. Their culture is similar to that of Cattleyas. The Mexican varieties require an abundance of light, air and moisture when growing.

	Each
LÆLIA acuminata . Flowers white, some- times tinged with rose. Costa Rica. Win- ter.....	\$1.50 to \$3 00
albida . Flowers white, lip rose-flushed. Mexico. Winter, spring.....	\$1.50 to 2 50
anceps . From two to six flowers on scape. Sepals and petals rose; lip crimson- purple. Mexico. Winter.....	\$2 to 5 00
anceps alba . Bulls variety.....	25 00
anceps Hilli	\$5 to 10 00
anceps Holidayana	\$5 to 10 00
anceps Sanderiana	\$5 to 10 00
anceps Schröderiana	\$5 to 10 00
autumnalis . Flowers purple; lip rose and white; yellow center, borne on long spikes.....	\$1.50 to 3 00
Boothiana . Scapes two- to five-flowered, large. Sepals and petals rose-purple, with deeper veins. Lip crisped crimson- purple. Brazil. Spring.....	3 00
cinnabarina . Flowers orange-scarlet. Bra- zil. Spring.....	\$2.50 to 5 00
crispa . Flowers white, sometimes flushed; lip crisped veined deep purple. Spikes four- to nine-flowered. Brazil. Summer.	\$3.50 to 5 00
Dayana ; syn., <i>pumila</i>	2 50
Dayana ; syn., L. C. × elegans	\$7.50 to 15 00
flava . Flowers canary-yellow, borne on erect spikes. Brazil. March.....	2 50
grandis tenebrosa . Large flowers of nan- keen-yellow. Brazil. May.....	\$4 to 7 50
harpophylla . Bright orange-red flowers. Brazil. Spring.....	2 50
Jongheana . Large, flat flowers, borne on one- to five-flowered scapes. Petals and sepals soft rose-purple; lip crisped, dark rose-purple. Brazil.....	2 50
majalis . Sepals and petals rose-lilac; lip white in center, margined and marked with mauve-purple. Mexico. Summer.	\$1.50 to 2 50
majalis alba	25 00
Perrinii . Flowers large; sepals and petals rose; front lobe of lip deep crimson- purple. Brazil. October.....	\$2.50 to 5 00
præstans ; syn., <i>pumila</i> . Flowers rose- purple; lip purplish crimson. Brazil. Autumn.....	\$1.50 to 3 00

	Each
Lælia purpurata . A grand species. Flowers very large; sepals and petals light rose- white or white; lip crimson-purple. Brazil. Spring.....	\$2.50 to \$5 00
Large plants.....	\$7.50 to 15 00
superbiens . The long spikes bear from ten to twenty flowers. Deep rose petals and sepals; crimson lip.....	\$2.50 to 5 00

Odontoglossum Crispa Harryanum (see page 24)

ODONTOGLOSSUM

The most extensively cultivated of all cool-house Orchids. The flowers of most varieties are of great beauty and utility. They are found in mountainous regions facing the Pacific from Southern Mexico to Peru.

With but few exceptions, they like an even, cool and moist temperature throughout the year.

Odontoglossum Andersoni- Each
anum. Sepals and petals are pointed, creamy white, spotted and marked with red-brown. Colombia.
 Winter.....\$3.50 to \$5 00

Odontoglossum \times Rolfeae

Odontoglossum Bictoniense. Sepals and petals yellowish green, blotched with chestnut-brown; lip pale rose. Guatemala. Autumn.....	Each \$2 50
Cervantisii. Flowers white or tinged with rose; chocolate-red streaks around the base. Mexico. Spring.....	2 00
citrosimum. Flowers tinted flesh-color; fragrant; produced on long, pendulous spikes.....	\$2 to 3 50
cordatum.	2 50
cirrhosum. Flowers large, sepals white, spotted with purplish crimson, petals broader; similarly colored. Ecuador. Spring.....	3 00
crispo Harryanum.	20 00
crispum. Flowers large, white, often tinged with rose and more or less blotched. Borne on many-flowered spikes....	\$2 to 3 50
crispum, E. B. Dane. Petals, sepals and lip blotched violet-purple. Very large, wide lip. Very unique.....	Price on application

Odontoglossum crispum Xanthodes. Each
Flowers pure white; sepals and lip
blotched with yellow. Rare
Price on application.

Edwardi \$7 50

grande. Baby Orchid. Flowers very large chestnut-brown and yellow. Guatemala \$1.50 to 3 00

Halli. Flowers produced on long scapes, sepals yellow with dark chocolate-red blotches; petals similar but margined with yellow. 5 00

Harryanum. Flowers borne on long, sometimes branched spikes, large; sepals deep chestnut-brown tipped and broken with yellow; petals whitish at base marked with mauve-purple. Lip tri-lobed, striped with purple..... 5 00

Insleayi. Similar to *O. grande*. Mexico..... \$2 to 4 00

Krameri 2 50

laeve. Flowers large, fragrant, borne on long, branched scapes. Sepals and petals dark brown, tipped and barred with yellow; lip lilac-purple. Mexico. Spring. 5 00

luteo-purpureum. Large flowers; sepals nearly covered with chestnut-brown, marked with yellow. Petals similar, only more yellow. Lip yellowish white with large brown spot in front..... 5 00

maculatum. Flowers 2 to 3 inches across. Sepals dark brown, tipped and broken with yellow; petals yellow, spotted brown. Lips yellowish white, spotted brown. Mexico..... 2 50

Pescatorei. Popular species. Flowers white, sometimes rose-flushed; lip sometimes purple-spotted. Produced on long, branched spikes. Colombia. Spring. \$2 to 3 00

pulchellum. Flowers pure white, fragrant. Useful. Guatemala. Spring..... 2 00

Rosii-majus. White or rose-flushed; spotted dark brown. Mexico. Winter..... 2 00

Odontoglossum crispum, var. E. B. Dane

Odontoglossum triumphans. Petals and sepals golden yellow; barred and blotched with chestnut-brown. Colombia. Spring.....	Each \$3.50 to \$5 00
Uro-Skinneri. Sepals and petals greenish marked with chestnut-brown; lip large rose, mottled with white. Guatemala. Spring.....	5 00
Williamsianum. Costa-Rica. Summer....	10 00

Odontoglossum Hybrids	
Odontoglossum × Beaute Cœleste. (× armain villierense × crispum).....	Each \$25 00
× excellens. Pescatorei × triumphans	15 00
× harvengtense. Crispum × triumphans	15 00
× Ossultoni. Pescatorei × spectabile	25 00
× Rolfeæ. Harryanum × Pescatorei	25 00
Wilckeanum. Crispum × luteo-purpureum	15 00

ONCIDIUM

A genus of epiphytal Orchids of great variety and commercial value. They are found from Mexico throughout Central America and West Indies to Brazil. They grow best in a temperature of from 50 to 55 degrees.

They require plenty of air and moisture when growing. When growth is completed, water must be given but sparingly but in no case entirely withheld, otherwise the plants are apt to shrivel.

They may be grown in baskets, pots or pans in a mixture of fibrous peat and sphagnum moss.

As with most Orchids the best time for repotting Oncidiums is after flowering.

Many Oncidiums are very prolific bloomers.

Oncidium altissimum.

Flowers on long-branched scapes. Pale yellow, barred and blotched with chestnut-brown. West Indies. Summer. \$2.50 to \$4 each.

ampliatus majus.

Flowers bright yellow, with some red-brown blotches. Central America. Spring. \$2.50 to \$5 each.

barbatum. Brazil.

Autumn. \$2.50 ea.

Cavendishianum. Flowers

fragrant, 1 to 2 inches across, yellow-spotted with red. Guatemala. Spring. \$2 to \$3.50 each.

Cebolleta. \$3 each.

concolor. Large, bright yellow flowers. Brazil. Spring, summer. \$2.50 each.

corinigerum. \$5 each.

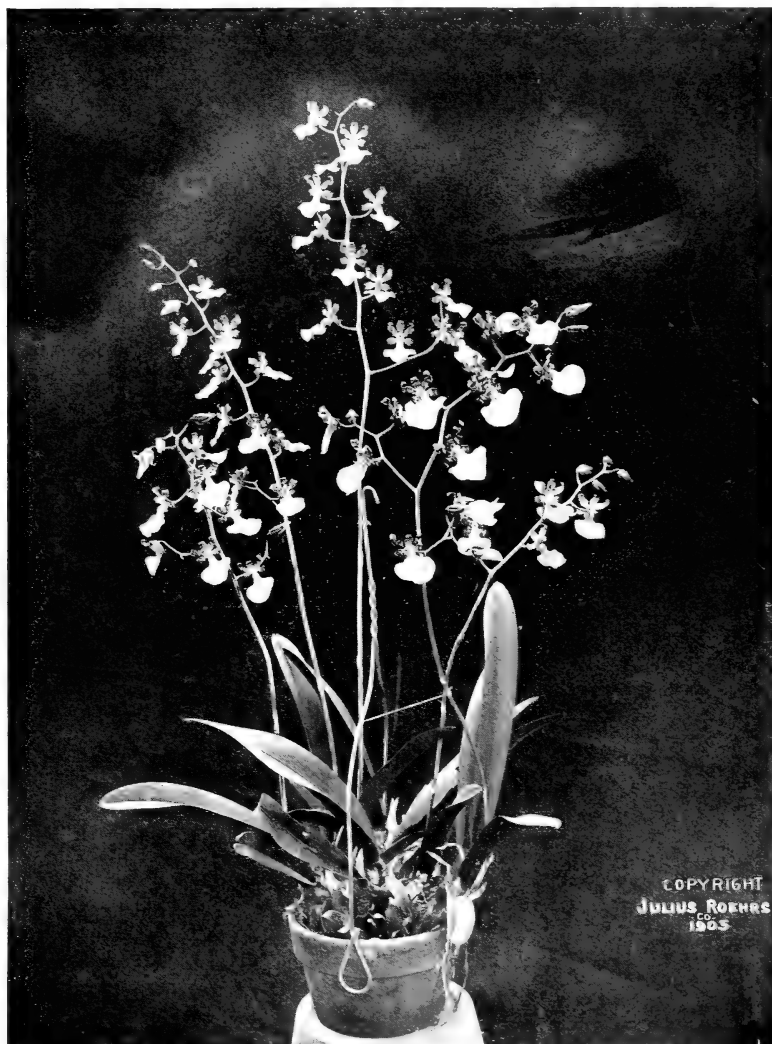

crispum. Flowers large, chestnut-brown; yellow-spotted lip. Brazil \$2 to \$3.50 each.

curtum. Brazil. Spring. \$2 to \$3 each.

divaricatum. \$3.50 each.

excavatum. Flowers borne on branches, many-flowered scapes. Sepals and petals yellow, spotted with red; lip canary-yellow. Peru. Autumn. \$2.50 each.

flexuosum. Petals and sepals red-brown tipped greenish yellow. Lip canary-yellow. Brazil. \$2 to \$3.50 ea.

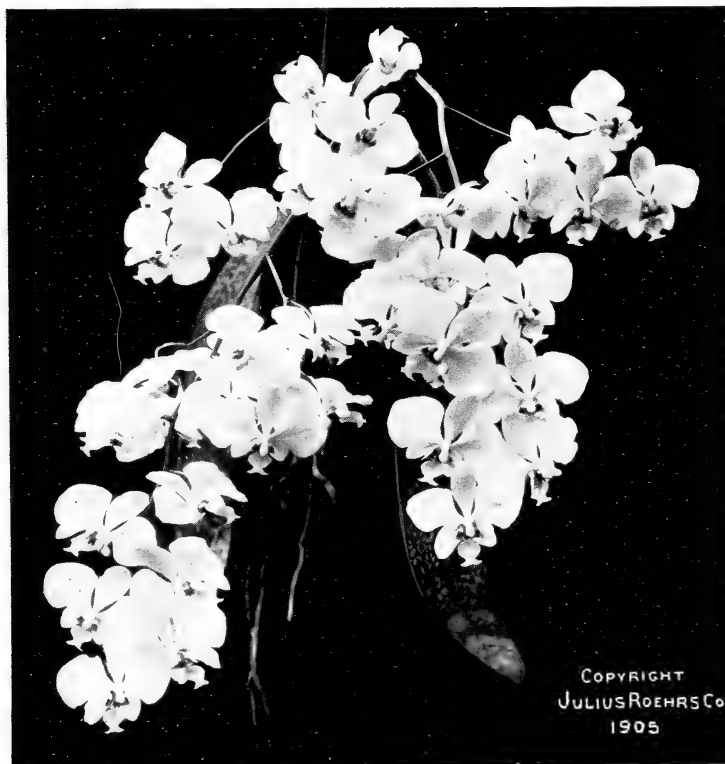

Oncidium splendidum (see page 26)

Oncidium Forbesii. Rich chestnut-brown flowers, with narrow golden yellow margin. Brazil. Autumn.....	Each \$2 50
Gardneri. Brazil. Summer.....	3 00
Harrisonianum. Produces many-flowered branched scapes. Flowers small, bright yellow, blotched with red. Brazil. Autumn.....	\$1.50 to 2 50
hastatum. Mexico. Summer.....	4 00
Jonesianum.	3 50
incurvum. Flowers small, fragrant. Pink and white. Mexico. Autumn.....	2 00
Kramerianum (Butterfly Orchid). \$1.50 to	2 50
Lanceanum. Large, fragrant flowers. Sepals and petals yellow, spotted chocolate-brown; lip rose-purple. Trinidad and Guiana. Summer.....	3 50
leucochilum. Large flowers, produced on long, branched scapes. Sepals and petals yellowish green, blotched dark brown; lip white.....	3 50
microchilum. Guatemala. Summer.....	\$2.50 to 5 00
macranthum. One of the grandest Oncidiums. Tropical America. Spring, summer.....	5 00
Marshallianum. Flowers large; sepals and petals yellow, spotted with red-brown. Lips yellow. Brazil.....	\$2.50 to 3 50
oblongatum.	2 50
ornithorhynchum. Very sweet-scented. Flowers rose-lilac, produced on long, many-flowered drooping spikes. Mexico. Winter.....	\$2 to 3 50
ornithorhynchum album	\$15 to 25 00
Papilio-majus (Butterfly Orchid). Trinidad.	2 00
Oncidium phymatochilum.	Each \$2 00
pulvinatum. Flowers red-brown and yellow produced on long, branched, many-flowered scapes. Brazil. Summer.....	2 00
sarcodes. Flowers large, petals and sepals chestnut-brown, bordered with yellow. Lip bright yellow, spotted brown. Brazil. Spring.....	\$2.50 to 5 00
sphacelatum. Mexico. Spring.....	\$1.50 to 2 50
splendidum. One of the very best for cutting. Large flowers borne on erect scapes. Sepals and petals yellowish green, blotched with rich brown lip; clear yellow. Guatemala. Winter.....	\$1.50 to 5 00
tigrinum. Flowers large and fragrant. Sepals and petals yellow, heavily blotched. Lip bright yellow. Mexico. November to December.....	\$2 to 3 50
uniflorum. Brazil.....	2 00
varicosum Rogersi. One of the finest and most useful Orchids. The long-branched spikes bearing an abundance of large, yellow flowers. Very fine for decoration. purposes.....	\$1.50 to 3 50
ORNITHIDIUM densum.	5 00
Sophrontis	3 50
ORNITHICHILUS frescus.	5 00
PERISTERIA elata (Dove Orchid). Flowers fragrant, 2 to 3 inches across, waxy white, often spotted with purple... \$2 to	3 00
PESCATOREA cerina. Costa Rica.....	\$2 to 2 50
Klabockorum.	\$10 to 15 00
PHAIUS grandifolius. Spikes 3 to 4 feet high. Petals and sepals yellow-brown; lip rose-purple, bordered white. Very showy. \$2.50 to \$3.50 each.	

Sanderiana. \$5 each.
Wallichii. \$3 each.
Cooksonii (P. grandifolius × Humboldtii). \$10 each.
Marthæ (Blumei × tuberculosi). \$10 each.
Norman (Blumei Sanderianus × tuberculosi). \$10 each.

PHALAENOPSIS

One of the most beautiful and most admired Orchids, producing its flowers on long, sometimes branching spikes during the winter months. Though widely distributed throughout the eastern tropics most of the showy members are confined to the Philippines and adjacent islands. They require a hot, moist temperature, fairly well shaded, and grow best, suspended near the glass, in pans or baskets, in a mixture of sphagnum moss and some fibrous peat, with lots of drainage. They should not be repotted too often and when it is done great care must be taken not to injure the roots too much.

COPYRIGHT

9 ft. wide by 10 ft. high; 10 pieces to a bale.
10 ft. wide by 12 ft. high; 10 pieces to a bale.
2 cts. per sq. ft.

Muratori's Automatic Hand Sprayer

The best and most reliable instrument ever invented for spraying Orchids. Used with either clear water or liquid insecticides. It diffuses an even, dew-like spray on every part of the plant, in a manner impossible to be obtained by any syringe. Full directions with sprayer. Price, in burnished copper, \$15.

Nico-Fume Liquid. $\frac{1}{2}$ gallon, \$5.50; gal. \$10.50

BOOKS ON ORCHIDS

ORCHIDS, THE BOOK OF. By W. H. White, F.R.S. The author of this book is Orchid-grower to Sir Trevor Lawrence Bart, President of the Royal Horticultural Society of England, and one of the foremost authorities on the subject. Price, \$1.

ORCHIDS, THEIR CULTURE AND MANAGEMENT. By W. Watson, Curator Royal Gardens Kew, England. Descriptions of all the kinds in general cultivation. A new edition of this book has recently been issued. Price, \$10.

ORCHID-GROWERS' MANUAL, THE. By B. S. Williams, F.L.S., F.R.H.S., Super royal, 8vo., gilt edge, cloth; 300 illustrations. Contains 800 pages and description of upwards of 2,500 species and varieties. The most complete work on Orchids published. Price, \$10.

ORCHIDACEOUS PLANTS, MANUAL OF. By James Veitch & Sons, England. 2 vols. freely illustrated, 8vo. Botanical treatise on Orchids and their history. Price, \$33.50.

ORCHID-CULTIVATOR'S GUIDE-BOOK, THE AMATEUR. By H. A. Burberry. A concise and easily followed book, dealing plainly with all the most important points. Price, \$2.50.

ORCHID STUD BOOK, THE. By Robert Allen Rolfe, A. L.S., and Charles Chamberlain Hurst, F.L.S. An enumeration of Hybrid Orchids of artificial origin. With their parents, raisers, date of first flowering, references to description and figures and synonymy. With an historical introduction and 120 figures and a chapter on Hybridizing and raising Orchids from seed. Price, \$4.

ORCHIDS, FERTILIZATION OF, THE. By Charles Darwin. Dealing with the various contrivances by which Orchids are fertilized.

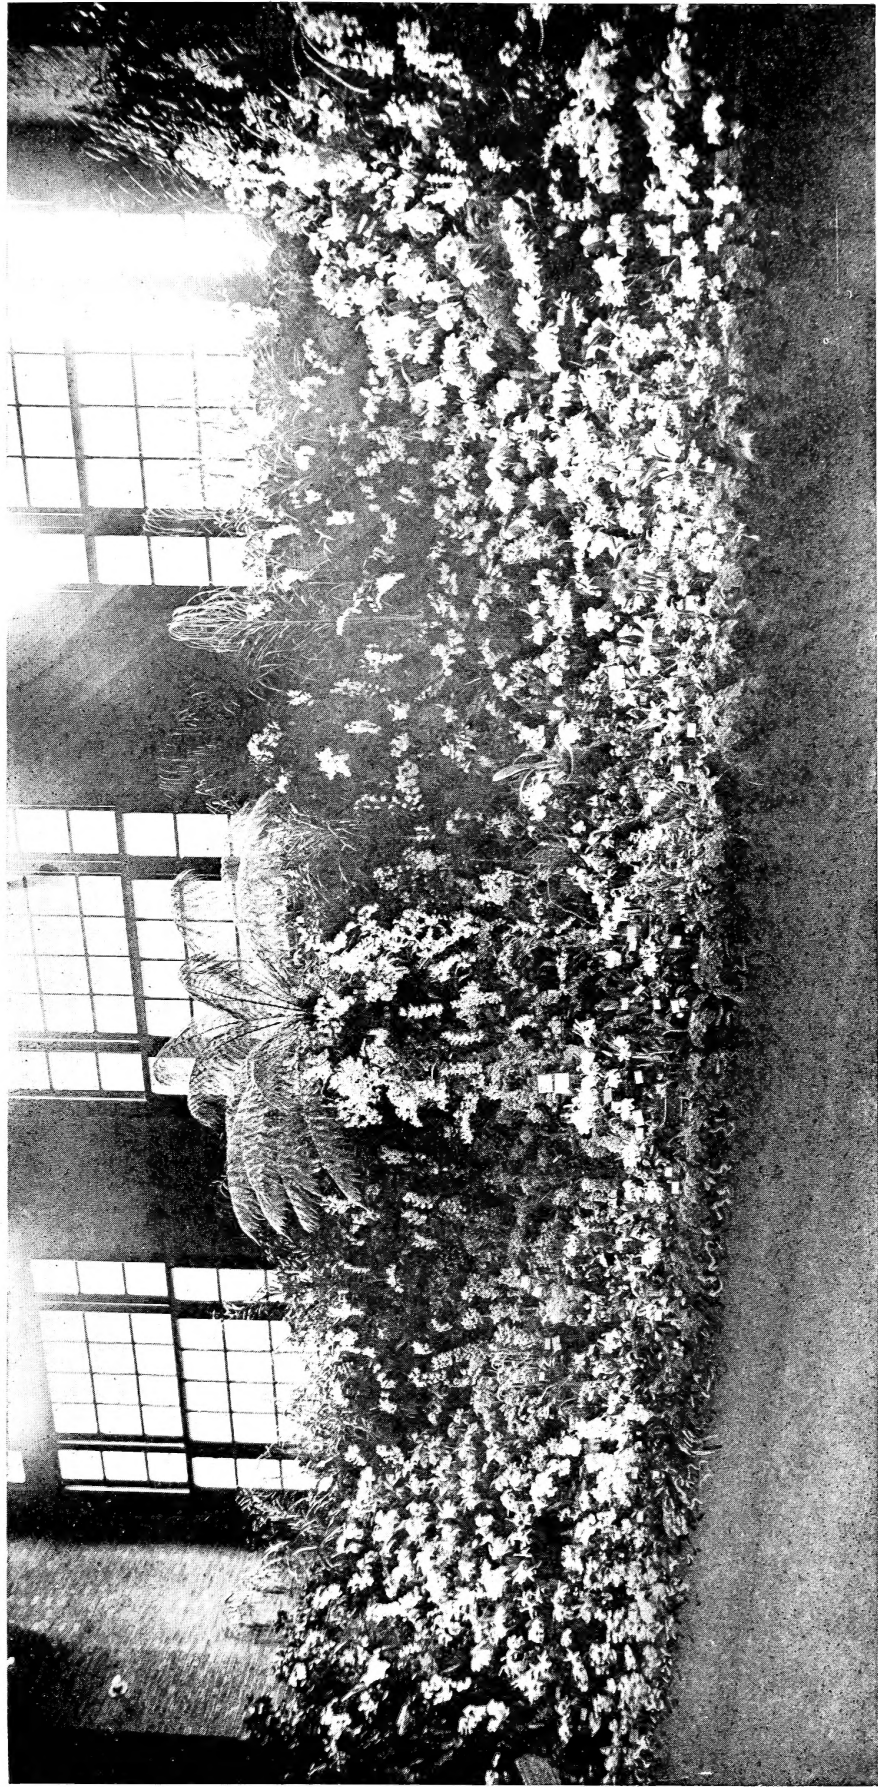

THE CULTURE OF GREENHOUSE ORCHIDS. By Frederick Boyle. A book on Orchids and their culture especially written for amateurs.

We beg to draw the attention of our patrons to the other departments of our establishment. We have many houses filled with choice Stove and Flowering Plants, Palms in all sizes for the conservatory and rare varieties, Ferns and plants for forcing.

We always have on hand large quantities of Bay and Box trees in all sizes, Evergreens, etc. A copy of our General Plant Catalogue will be sent on application.
